Lettuce & Herb Plant Instructions

Crops with differing variations like Lettuce and herbs are started the same. Sow seeds outdoors in a sunny spot first work and apply some rich fertilizer. Sow seed .25 inches deep (1/16 inches deep for Oregano and Peppermint, directly on the soil surface for Lemon balm) about 1 inch apart in rows about 20 inches apart. Firm soil over seeds. In about 2 weeks seeds should germinate. Parsley and Sage take about 25 days and Rosemary can take up to 30 days and can even germinate sporadically.

Thin to 6-12 inches (Around 36 inches for Rosemary, about 24 for Tarragon) when seedlings are 2 to 4 inches tall. Keep soil moist and fertilize every month to about every month and a half

For even earlier harvest, sow seeds indoors 6-8 weeks before season.

Prime Temp
60-70°F

Prime pH
6-7

Hardiness Zones
5-8

Germination Rate: 70% and up!
